Day 4 Challenges

1. **Day of the Week Challenge**:
   Write a `switch` statement that takes an integer (1 through 7) and prints out the day of the week it corresponds to. Make sure to handle invalid numbers with a `default` case.

2. **Temperature Advice Challenge**:
   Create a `switch` statement with ranges that prints out advice depending on the temperature (in Fahrenheit). Consider the following ranges: less than 30, 30 to 45, 46 to 60, and above
